

Warrikainie

Please note, this is a beta version with a limited testing period. An internet connection is required to run the app.

Please send your feedback to email: info2@a-sky.nl

Playback starts with a delay depending on system performance.

Supported formats:

pcm: aiff, wav, flac

Supported resolution:

16 бит 44.1 кГц

Output mode:

ASIO

System requirements:

2 cores processor

installed memory - at least 4 GB, of which 2.6 GB must be free

operating system - Windows 7 or newer

Installation.

Installation is not required. Unpack the archive to a suitable location on the disk.

Customization.

At the first launching, a list box of the ASIO driver appears after the initial splash screen. Just click on the desired and active ASIO driver.

In the future, if a selected DAC is active, and its internal settings are unchanged, the setup mode is skipped when you start the player.

To enter the setup mode, when starting the player, click on the initial screen saver or press the "Enter" button.

Control.

To control the player, use the on-screen buttons.

Short keys:

"S" – stop

"N" – the next track

"Space" – play / pause

"Up" – scroll up

"Down" – scroll down

"Shift + Up" – move a track one position up

"Shift + Down" – move a track one position down

"Delete" – delete a track

"C" – clear playlist

Other.

The ASIO driver buffer is set on the value recommended by the DAC manufacturer or higher.
