Supported formats:

pcm: aiff, wav, flac, alac & cue files

dsd: dff, dsf

Supported sampling rates:

44.1 kHz to 384 kHz

Output mode:

WASAPI Exclusive

System requirements:

2 cores processor (4 core recommended)

installed memory - at least 4 GB (8 GB recommended), of which 2.6 GB must be free

operating system - Windows 10

Installation.

Installation is not required. Unpack the archive to a suitable location on the disk.

Customization

At the first launching, a list box of the WASAPI driver appears after the initial splash screen. Here you need to select which driver will be used: original from the DAC manufacturer or standard Windows (by default), then select the active WASAPI driver.

In the future, if a selected DAC is active, and its internal settings are unchanged, the setup mode is skipped when you start the player.

To enter the setup mode, when starting the player, click on the initial screen saver or press the "Enter" button.

When you select the WASAPI driver, a settings window appears. Here you can adjust the configuration of the player.

Control.

To control the player, use the on-screen buttons

Save playlist - right click on the list of tracks

Delete playlist - right-click on the selected playlist

Load a playlist - double-click

Short keys:

"P" - play

"S" - stop

"N" - the next track

"Space" - play / pause

"Up" - scroll up

"Down" – scroll down

"Shift + Up" - move a track one position up

"Shift + Down" - move a track one position down

"Delete" - delete a track

"Shift + C" - clears current playlist

Covers

The format of the main cover is "png" or "jpg"

The name of the main cover is "cover" or "front"

The location of the main cover - where the tracks are, or in the subdirectory "Art"

The format of the picture file of the track is "png"

The file name of the picture of the track is the name of the track file

The location of the picture file of the track is in the "Art" subdirectory

Other

The WASAPI driver buffer is set on the value recommended by the DAC manufacturer or higher.

You can open tracks only with the same sample rate at the same time.
